**A LONG TIME AGO, IN A WORKSHOP FAR, FAR
AWAY....**

6 WEEKS WEEK BY WEEK

K-250 – the reprogrammed Imperial security droid from Rogue One and Andor. Tall, skeletal, dryly hilarious. A black/charcoal full-body droid suit with a printed head and glowing white eyes.

Steady wins. May the Force be with you.

6 WEEKS TO K-250

Weeks 6-5	Plan + order filament, charcoal paint, platform boots	.
Weeks 4-3	Print + finish the head - white eyes + weathering	.
Week 2	Chest, shoulders, hip plates	.
Week 1.5	Long shins + platform boots integration	.
Week 1	Dress rehearsal + game day	.
APPENDIX	Quick reference & game day	.

🕒 YOUR FIRST WEEKS — WHERE MOST BUILDS DIE

Nearly every abandoned build dies in the first quarter: parts not ordered, printer not tested, nothing started. Win the first weeks — order everything, print one test piece — and the rest is downhill.

PICK YOUR BAR

*One reprogrammed security droid, three heights of finish — from "tall guy in black" to full skeletal scale. The same build can be finished to three different bars — pick yours **now**, because builders who polish for the wrong one burn weeks.*

LEAN · €120-180

Casual

Reads as K-2SO at 5m and across a crowded hall — black hoodie-and-cargo base, a foam-board chest plate and shoulder caps, and a printed cardboard head with battery LED eyes. Skip the holster, hip plates, and clean panel lines; lean on your own height and the silhouette to sell it.

EFFORT · ~14 hrs

MID · €200-280

Convention

Reads as K-2SO at conversation distance, where most builders land — a fitted charcoal bodysuit, EVA-foam chest, shoulders, and hip plates with sanded edges, a sculpted or 3D-printed head, and steady pale-blue eye glow. Add the belt, holster, and a light wash to break up the matte black; that's the convention sweet spot.

EFFORT · ~38 hrs

SCREEN-ACCURATE · €300+

Screen-Accurate

Reads as K-2SO under inspection and in photos — a fully 3D-printed, accurately-proportioned head with diffused even eye lighting, segmented limb armour over a stilt or lift frame, and the exact matte-charcoal weathering of the Rogue One build. Screen accuracy demands the full skeletal proportions, correct panel gaps, and a working control panel; there's no costuming club for droids, so the reference photos are the only judge.

EFFORT · ~58 hrs

THE FALLBACK PLAN

*A first-time build of this suit is **30–60 hrs** of hands-on work across **6 weeks**. Life happens — so decide right now what gets cut when the clock wins. Finished beats perfect.*

BEHIND EARLY Drop first: No Cape, Blaster (optional). Nobody will notice at 5m.

BEHIND LATE Simplify next: Belt + Holster, Hip Plates, Reference & Fit — buy instead of make, or borrow.

EMERGENCY Every printed part has a buy option. Switching one part to bought can save a whole week.

ALWAYS The final week is for wearing it, not building it — dress rehearsal beats one more coat of paint.

🕒 THE HONEST RULE

If a piece is not started two weeks before the event, it is not in this year's costume. Build it for the next one.
